"As the alleged mistreatment occurred in the bathroom on the first floor I cannot account for Mrs. Sage's presence out of her ward. It seems that the child was going to the bathroom, when Mrs. Sage entered, asking, the child says, if she was a bad girl. The girl answered that she was not bad, and says that Mrs. Sage then caught hold of her and began to beat and scratch her, and struck her on the head with a tin cup. As considerable noise was being made in the scuffle, the child says that Mrs. Sage closed the bathroom door to keep the noise from being heard.

Afterwards she ninced a clean nightpown on the child. The child admits having bitten Mrs. Sage but says it was after she had been struck by the woman.

"Miss Ensterman, the nurse in charge of the first floor, heard the disturbance, went to the bathroom and demanded that Mrs. Sage resented the interference as tending to destroy discipline.

"As my room is in the east annex of the building. I did not hear the disturbance. The next morning the neighbors said they heard the child's screams. By this time we had investigated the matter and Mrs. Sage was discharged and the humane of ficers notified."

Doctor Rotteck described the inturference is standily decreasing, so far as St. Louis have the necessary certificates and thus far no one has been detained.

This is a serious matter to the husband of father who is solicitous for the future of his dear ones. Often the heart trouble is caused by an meaperted thing and can be corrected if taken in time and properly treated. A man in Colorado writes:

"I was a great coffee drinker for many years, and was not aware of the injurious effects of the habit till I became a practical invalid, suffering from heart trouble, indigestion and nervousness to an extent that made me wretchedly miserable myself and a nuisance to those who witnessed my sufferings.
